

Maggie Maguire

Product Designer — AI-Native Products & Design Systems

maggiemaguire.github.io • linkedin.com/in/maguiremr • New York, NY • (860) 578-0296 • maggiemaguire674@gmail.com

Senior Product Designer specializing in AI-native product experiences and design systems, with a track record of turning ambiguous problems into shipped roadmaps.

EXPERIENCE

Buildium — Mid-level Product Designer

2024 – Present | Boston, MA

- Established trust, transparency, and user control patterns for Buildium's non-deterministic AI interfaces, as the first designer to work on AI in the product.
- Pioneered UX patterns for Buildium's generative and agentic AI features, including system prompts, multi-step Human-in-the-Loop flows, AI-generated summaries, and chatbots. Exceeded adoption targets by 12%.
- Shipped Buildium's generative AI features in two iterative milestones, defining success metrics upfront and prioritizing each next step with real usage data, in close partnership with PM and Engineering.
- Defined and documented an AI design system across the product, including AI-specific components, gradients, and iconography. Onboarded the design team to apply and scale these patterns consistently across future work.
- Reduced time spent across our design process by 36% by adopting AI-augmented prototyping and documentation tools and sharing them with my team.

Buildium — Associate Product Designer

2022 – 2024 | Boston, MA

- Redesigned the electronic payment application UX, achieving a 40% reduction in user completion time and elevating workflow assessment scores by 60%.
- Drove half a million a year in new sales revenue for Buildium Property Insurance by designing a high-conversion onboarding experience that activated 427 Property Management Companies and 1,100 lease policies.
- Defined the strategic roadmap for the scrum team, translating the high-level maintenance vision into actionable epics and milestones, including Project Management, Time Tracking, and Vendor Improvements.
- Led 26+ comprehensive user research initiatives, managing the end-to-end process from research planning and moderator guides to the production of key artifacts that informed product strategy.
- Scaled design capacity by voluntarily increasing workload to support additional cross-functional scrum teams, ensuring seamless design-to-development handoffs across multiple workstreams.

McKinsey & Company — Client Technology Product Designer

Jan 2021 – Aug 2021 | Waltham, MA

- Spearheaded the UX transformation of a complex Excel-based sustainability model into a full tech-enabled solution for McKinsey clients.
- Synthesized multi-stakeholder research and validated prototypes to simplify data-heavy workflows as the sole designer on a cross-functional team.

ServiceNow, Inc. — Associate Product Manager

Jan 2020 – Jul 2020 | Santa Clara, CA

- Led the end-to-end launch of an updated Customer Success Center, resulting in a 30% MAU increase.
- Managed cross-functional workflows across Design, Dev, and SEO; conducted competitive research and UAT to align technical constraints with business objectives.
